Marshall J. Benbow, M.D., FAAP

Tina H. Boylston, M.D., FAAP

Shelly M. McNair, M.D., FAAP

Shannon M. Austin, M.D., FAAP

Krista M. Vizquete, M.D., FAAP

KaraLin Root, D.O., FAAP

Gregory W. Hanson, D.O., FAAP

Tiffany Ponzio, M.D., FAAP

Southwest Children's Center, P.A. has been providing superior pediatric care to the families of San Antonio and its surrounding areas since 1977. Our practice has grown to become one of San Antonio's premiere pediatric groups, and we are still owned and operated by the physicians that provide your child's care. Our award-winning team is made up of board-certified pediatricians, licensed vocational nurses, medical assistants, a respiratory therapist, and an experienced support staff to assist you.

We strive to provide quality continuity of care at the time you and your children need us the most. In addition to our standard business hours, we offer weekday after-hours, weekend urgent care visits and fast pass visits. We are conveniently located in the South Texas Medical Center with ample free parking.

Accessing your child's physician or clinic should not be difficult. We pride ourselves in providing quality, convenient health care for your family. Our experienced triage team will address your concerns and ensure that your children receive the care they need in a timely manner. If your child should need the services of a pediatric specialist, our referral department will assist you in scheduling those appointments. Our onsite laboratory enables our physicians to provide complete and timely care without leaving the office. In addition to these services, our experienced support staff is here to help you with any questions or concerns.

We look forward to caring for your child and becoming your child's medical home.

POLICIES AND PROCEDURES

Appointments

We see patients, by appointment, seven days a week. If you arrive without an appointment, you may not be able to see the doctor. Walk-in patients and late arrivals greatly decrease the efficiency of our physicians and are unfair to patients who are on time and have scheduled appointments.

We encourage patients to arrive 15 minutes prior to their scheduled visits. For families with multiple children, each patient must have a separate appointment.

It is best to schedule non-urgent appointments, such as well check-ups, sports/camp physicals, and parent consultations at least two weeks in advance.

As a courtesy to our patients, we provide an automated phone call and text message appointment reminder two days prior to the scheduled appointment. Standard text message rates may apply.

Late Arrivals/Missed Appointments

Your timeliness affects our ability to provide our patients with efficient medical care. Thus, our office has little tolerance for late arrivals and missed appointments.

You will be charged a fee for all missed appointments. If you arrive late for a non-urgent visit, we may have to reschedule your appointment.

Excessive late arrivals and missed appointments could result in dismissal from Southwest Children's Center, P.A.

Fast-Pass Visits

Fast-Pass Visits are our first morning appointments of the day. These appointments are scheduled online, beginning at 5PM the day prior through our website.

Fast-Pass Visits are for acute illnesses such as vomiting, sore throat, trouble breathing, and same-day COVID clearances that need to be addressed first thing in the morning. Less urgent or more chronic sick symptoms should be scheduled for later in the day.

These visits are intended to eliminate unnecessary urgent care visits, avoid fragmented medical care and ensure appropriate follow-up for our patients.

Fast-Pass Visits will not be offered on weekends and holidays secondary to limited physician staffing.

You will be charged a fee for missed appointments.

Weekend and After 5 Appointments

Weekend appointments and appointments after 5 p.m. are available for emergencies and acutely ill established patients.

On weekends, we open and begin scheduling appointments at 8 a.m., and the office closes at 12 noon or after the last scheduled appointment (whichever comes first).

All patients must have an appointment to be seen. Fast-Pass Visits are not available on the weekends.

On the weekends and after 5 p.m., there will be a convenience fee billed to your insurance. If the fee is not covered by your insurance, you may be responsible.

Holiday Appointments

Our office is closed on New Year's Day, Easter Sunday, Independence Day, Thanksgiving Day and Christmas Day.

Our office is usually open for emergencies and acutely ill established patients on all other holidays.

On select holidays, we are open and begin taking appointments at 8 a.m., and the office closes at 12 noon or after the last scheduled appointment (whichever comes first). On holidays, there will be a convenience fee billed to your insurance. If the fee is not covered by your insurance, you may be responsible.

All patients must have an appointment to be seen. Fast-Pass Visits are not available on holidays.

Nurse Triage

Our experienced phone triage staff is available to you during office hours to answer medical questions or concerns.

After Hours Call

After the clinic closes, our phone calls are triaged through Methodist Children's Hospital Nurse Triage Service. One of our physicians is always available if they cannot address your concerns.

Immunizations

Southwest Children's Center, P.A. follows the immunization guidelines recommended by the American Academy of Pediatrics, Advisory Committee on Immunization, Center for Disease Control and Prevention, and the State of Texas. To provide a safe medical home for all our patients and their families, Southwest Children's Center will not accept new patients whose parents choose not to vaccinate.

Ear Piercing

Ear piercings are available for children ages 3 months and up. Patients must be up-to-date with their vaccinations prior to piercing. Southwest Children's Center, P.A. utilizes the Blomdahl® Medical Ear Piercing System, a system only available to physicians, which offers sterile equipment and nickel-free, hypoallergenic earrings to minimize the health risks associated with ear piercing. All ear piercings are performed by physicians within the office.

*Note : Our policies and procedures are subject to change at any time.

NEW BABIES

Hospital Stay and First Appointment

Southwest Children's Center's newborns are cared for by the Texas Inpatient Pediatrician Services (TIPS) while in the hospital. Be mindful to register your baby under your Southwest Children's Center pediatrician's name while at the hospital. This ensures all information is transferred to us and TIPS is notified of the arrival of your new baby. A TIPS physician will see your baby within 24 hours of delivery and will continue to do so daily until discharge.

It is important that all our babies, regardless of where they are delivered, have a clinic appointment within 48 hours of discharge.

Insurance

Your new baby will need to be added to your insurance policy before they are 30 days old. If your baby is not added within 30 days of age, your insurance may deny paying any claims beyond the 30 days.

PARENT RESOURCES

As a pediatric practice, we are always seeking to provide you care and information that will improve the health of your children. Reliable sources of information on a range of pediatric topics are available at many places on the web.

Unfortunately, not all information is based on fact. We suggest several sites that provide reliable, and time sensitive information about a wide variety of current events and general pediatric topics.

The following sites are ones we recommend:

- Southwest Children's Center
www.southwestchildrenscenter.com
Physician Article Library
- American Academy of Pediatrics
www.aap.org
- Centers for Disease Control and Prevention
www.cdc.gov

Books we recommend:

- [Caring for Your Baby and Child: Birth to Age 5](#) by Steven P. Shelov
- [Baby 411](#), by Ari Brown and Denise Fields

NEWBORN DISCHARGE INFORMATION

Please assure that you bring a discharge sheet with the following data to the first clinic visit after discharge from the nursery.

Gravida/Parity	Method of Delivery (Presentation, Forceps, or Vacuum Extraction)
Maternal Group B Strep Status	Antibiotics Given in Labor (Number of Doses, Time of Last Dose)
